Table with 6 columns: Date, Notes, and 4 empty columns. Content includes: Monday March 14 (Sap starts to drip), Wednesday March 16 (Oh no! We burnt 8 litres of sap and the stockpot. Bummer.), Friday March 18 (Flooding in our basement window well! Bailing every hour at minimum . . .), Wednesday March 23 (Picked up new 12 quart stockpot to replace the one that was burned. \$15 purchase), Thursday March 31 (66 litres of sap collected. We had to give some away.), Wednesday April 6 (Whoa! Season ain't over yet. Over Thursday and Friday as the temperatures soared and we hit new highs of sap collected - we ended up giving away over 200 litres of sap to Paul and Chris and Aline's folks as we couldn't keep up with the flow.)
